Issue  
#29  
March  
2025

Fund objective

The Fund’s investment objective is to provide capital growth, to outperform and decrease in volatility with respect the crypto currency Bitcoin over the medium to long term. The strategy is based on an in & out trading activity that operates rigorously following the signals that arrive from a trading algorithm. The strategy itself is the result of an empirical analysis of the underlying observation over a period of 5 years. The fund is Eur based currency, it will not use derivatives, and it will not perform leveraged investments.

Fund moves

Throughout March 2025, Bitcoin (BTC) experienced notable fluctuations influenced by various political and economic events. The Fund started in long position.

Early March: Strategic Bitcoin Reserve Announcement

On March 2, 2025, President Donald Trump announced the creation of a Strategic Bitcoin Reserve, aiming to position the U.S. as the "Crypto Capital of the World." This reserve included cryptocurrencies such as Solana (SOL), Cardano (ADA), Ripple (XRP), Ethereum (ETH), and Bitcoin (BTC). The announcement led to a surge in the prices of these digital assets. Bitcoin's price jumped from approximately 81,000 Eur on March 1 to around 90,000 Eur on March 2. However, this spike was short-lived, and the price corrected to about 82,000 Eur by March 3.

Mid-March: Tariff Announcements and Market Reactions

On March 3, President Trump imposed 25% tariffs on imports from Mexico and Canada, effective March 4. This decision led to a significant drop in the U.S. stock market, with the S&P 500 falling by 1.8% and the Nasdaq-100 by 2.6%. Bitcoin's price mirrored this sentiment, declining to the minimum of around 77,500 Eur by March 4. Despite these challenges, a slight optimism emerged in the financial markets by March 5. The Dollar Index weakened, suggesting potential easing of trade tensions. Bitcoin's price responded positively, climbing back to 85,000 Eur on March 5.

Late March: Corporate Moves and Regulatory News

In late March, several corporate decisions influenced Bitcoin's price. On March 27, GameStop announced plans to raise \$1.3 billion through 0% 2030 convertible bonds to acquire Bitcoin. This move was met with skepticism, leading to a 15% drop in GameStop's shares. Bitcoin's price experienced volatility during this period. Additionally, the House Financial Services Committee scheduled a markup session for the STABLE Act, aiming to regulate stable coins. This legislative development introduced uncertainty in the crypto market, contributing to Bitcoin's price fluctuations. Considering the high risk of drawdown the fund closed the position in Bitcoin switching to "safe" mode.

End of March: Sentiment and Economic Indicators

As March concluded, Bitcoin's price remained sensitive to broader economic indicators. The implementation of President Trump's "Liberation Day" tariffs on March 31 led to market volatility and further correction. Bitcoin closed the Month at about 77'000 Eur with a monthly performance of -5.08%. The fund managed to reduce the monthly correction to -1.75%.

Risk Considerations

An investment in the Fund involves certain risk factors and considerations relating to the Fund’s structure and investment objective that prospective investors should evaluate before making a decision to subscribe for Shares. No assurance can be given that the Fund will succeed in meeting its investment objective. Moreover, past performance is not a guarantee of future results. The risks referred to in the Fund’s issuing document are neither specific nor exhaustive, and a financial advisor or other appropriate professional should be consulted for additional advice.
